Declaration of Conformity for SCHELL products with regard to the 'positive list' published by the German Federal Environment Agency ('Evaluation criteria for metallic materials used for products in contact with drinking water (evaluation criteria for metals)')

Dear Sir or Madam,

We hereby confirm that the products distributed by SCHELL GmbH & Co. KG conform to the requirements of the generally recognised codes of technical practice, and have been designed, engineered and manufactured in accordance with these codes.

This statement naturally also applies to the requirements governing the use of materials as set out by section 17 of the German Drinking Water Ordinance for products in contact with drinking water.

The materials used by Schell conform to the list published by the German Federal Environment Agency, 'Evaluation criteria for metallic materials used for products in contact with drinking water' (evaluation criteria for metals, in the current version). Since Schell's German manufacturing has exclusively used components made from these listed materials for products that have contact with drinking water, no further changes are required for Schell products in terms of this 'positive list'.

With best regards,
SCHELL GmbH & Co. KG
Fittings Technology
